**You would do anything to make sure she feels safe.  
 Who is doing that for you?**

The patented Smart Sole GPS shoe includes built in GPS technology to track down AD or dementia patients who are at wonder risk.

Caregivers can use their mobile phones or computers to track down their loved ones and they can even set up a "Free Zone" for the loved ones to wonder. If the wearer wonders off the safe zone, the shoe will text or email to the caregiver.

Please note: All shoes require a tracking plan. There are two tracking plans; a basic 30 minute tracking plan, which reports every 30 minutes (\$34.99) and for an additional \$5 per month a premier 10 minute tracking plan.
